DETAILED ACTION

Response to Arguments

1. Applicant's arguments, see paragraph 1 on page 9, filed 3/31/2006, with respect to claims 1-14 have been fully considered and are persuasive. The rejection of claims 1-14 has been withdrawn.

Allowable Subject Matter

2. Claims 1-14 are allowed.

3. The following is an examiner's statement of reasons for allowance: Chanda et al. (US 2002/0095498) discloses almost all of the limitations of claims 1 and 8. Chanda discloses grouping end users together into groups (referred to as clients), but does not disclose that the groups are closed user groups. As explained in the previous office action, "Edge Closed User Groups" discloses using CUGs along with excellent motivation to do so. However, neither Chanda, nor any other combination of prior art discloses the limitation "upon detecting that use of the connected segment for a given CUG is approaching the proportion of ring data transmission capacity allocated to the CUG, selecting an active one of the LAN clients of the CUG and sending a throttle message to the selected LAN client, the throttle message indicating that the LAN client is to reduce its data transmission rate." Chanda discloses monitoring on a group basis and issuing a throttle message to the group when necessary. Chanda does not teach or suggest choosing a single client from the group to receive the throttle message.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
